PROFILE

I am a dedicated frontend web developer who transforms creative visions into elegant digital realities. With every project, I leverage my mastery of modern web technologies to craft visually stunning, responsive, and user-centric websites. As a civil engineering student, I continuously refine my analytical and structural thinking, while my deep faith (in God) guides me to approach challenges with purpose and resilience.

WORK EXPERIENCE

AJ MARKETING AGENCY

2022 - 2023

Marketing Agency

- Boosted Lead Generation - Developed a high-converting website for a digital marketing agency, optimizing user experience to drive client inquiries and conversions.
- Increased Revenue Potential - Integrated marketing funnels and call-to-action strategies, enhancing customer acquisition and maximizing sales opportunities.
- Improved Operational Efficiency - Streamlined service offerings and content management, reducing friction in client onboarding and engagement.

RCCG REGION 22

2022

Pentecostal church

- Increased Digital Engagement - Designed and developed a Pentecostal church website with a blog for messages, boosting online sermon accessibility and engagement.
- Enhanced Giving Efficiency - Integrated a secure online giving system, streamlining donations and potentially increasing church revenue.
- Improved User Experience - Implemented various church functions online, enhancing community interaction and operational efficiency.
